

COURSE ANNOUNCEMENT: WILDLIFE HANDLING AND CHEMICAL IMMOBILIZATION

Wenatchee Valley College, WA; June 28-30, 2023

Home Range Wildlife Research is hosting a 3-day wildlife handling course June 28-30 (Wed-Fri.), 2023 at the Wenatchee Valley College, WA. The course will be taught by Dr. Mark Johnson of Global Wildlife Resources (GWR). GWR is dedicated to supporting wildlife professionals with humane capture and handling through training & field assistance. This class is one of the most extensive chemical immobilization courses in North America and includes hand-on labs with animals. It is invaluable to state/federal/tribal wildlife professionals, college students, and wildlife rehabilitators.

This unique training focuses on the field-based needs for chemical immobilization of captive and free-ranging wildlife. *With daily hands-on labs, this is the most extensive training you can receive in North America.*

3-DAY LIVE COURSES WITH HANDS-ON LABS EACH DAY

- **Chemical Immobilization** - participants immobilize live animals
- **TPR Lab** - a practice lab with live animals to prepare for the chemical immobilization lab
- **Drug Delivery Systems** - opportunity to practice the most effective projectors (i.e. dart guns)
- **Needle & Syringe Skills** - building professional habits for practical field use and human safety
- **Blood Collection Practice Station** - practice proper techniques for successful blood collection

Course Content Includes:

- * Drug Delivery Systems * Immobilizing Drugs * Drug Dose Calculations *
- * Five-Step Preparation for Field Operations * Legal Responsibilities *
- * Patient Monitoring * Sampling * Veterinary Emergencies *
- * Euthanasia * Human Safety * Post Capture Assessment *

GWR courses promote care and respect for every animal that is handled and are often profound personal and career experiences for course participants.

GWR courses build confidence, increase success, and strengthen resumes!

CEUs provided by The Wildlife Society and Ecological Society of America.

The course is limited to 25 participants so register early!
Places are reserved once payment is received.

Each course includes:
hands-on labs, course notebook, & Certificate of Training.
