Washington, D.C. 20515

The Honorable Thad Cochran  
113 Dirksen Senate Office Building  
Washington, D.C. 20510

The Honorable Nita Lowey  
2365 Rayburn House Office Building  
Washington, D.C. 20515

The Honorable Barbara Mikulski  
503 Hart Senate Office Building  
Washington, D.C. 20510

On behalf of the undersigned coalitions, which represent over 500 combined member organizations—incorporating the voices of industry, scientists, and higher education in the United States—we write to thank the Congress for making strong investments in America’s innovation ecosystem one of its highest priorities.

The FY 2016 omnibus appropriations bill would increase federal research funding by 5.4 percent above FY 2015 levels, providing an even larger increase than the Bipartisan Budget Act provided for discretionary spending. This robust investment in federal research provides much needed fuel for the engine of the American economy, our innovation ecosystem.

By providing real growth for federal investments in research, you have made an important step toward “renewing the federal commitment to scientific discovery,” one of several critical steps outlined in the statement Innovation: An American Imperative (see attached) recently endorsed by over 300 organizations from all fifty states representing American industry, higher education, science, and engineering, and a group of senior corporate leaders.

We look forward to continuing to work with you to ensure our nation’s economy, health, and national security will prosper for many years in the future.

Sincerely,

Dustin Todd  
Co-Chair, Task Force on American Innovation  
Semiconductor Industry Association

The Task Force on American Innovation (TFAI) is an alliance of America’s leading companies and business associations, research university associations, and scientific societies that advocates on behalf of federal funding of basic research in the physical sciences and engineering.

Nick Saab  
Co-Chair, Coalition for Aerospace and Science  
Lewis-Burke Associates LLC

Frank Slazer  
Co-Chair, Coalition for Aerospace and Science  
Aerospace Industries Association

The Coalition for Aerospace and Science (CAS) is an alliance of over 50 industry, university and science organizations united in our support for robust and sustained federal funding for the National Aeronautics and Space Administration (NASA).

John Latini  
Chair, Coalition for National Security Research  
Pennsylvania State University

The Coalition for National Security Research is a broad-based coalition of 74 members including industry, research universities and institutes, and scientific and professional associations committed to a strong Defense Science and Technology Program.
The **Energy Sciences Coalition (ESC)** is a broad based coalition of organizations representing scientists, engineers and mathematicians in universities, industry and national laboratories who are committed to supporting and advancing the scientific research programs of the U.S. Department of Energy (DOE) Office of Science.

Sam Rankin  
Chair, **Coalition for National Science Funding**  
American Mathematical Society

**The Coalition for National Science Funding (CNSF)** is an alliance of over 140 professional organizations, universities and businesses united by a concern for the future vitality of the national science, mathematics, and engineering enterprise.

Jack Cline  
President-Elect, **The Science Coalition**  
University of Kansas

**The Science Coalition** a nonprofit, nonpartisan organization of more than 60 of the nation’s leading public and private research universities that is dedicated to sustaining the federal government’s investment in basic scientific research as a means to stimulate the economy, spur innovation and drive America’s global competitiveness.

Jennifer Poulakidas  
Co-President, **United for Medical Research**  
Association of Public and Land-grant Universities

Tim Fenton  
Co-President, **United for Medical Research**  
Thermo Fisher Scientific

David Pugach  
Co-President, **United for Medical Research**  
American Cancer Society Cancer Action Network, Inc.

**United for Medical Research (UMR)** is a coalition of leading research institutions, patient and health advocates, and private industry that have joined together to seek steady increases in funding for the National Institutes of Health.

Juliane Baron  
Chair, **Friends of the Institute for Education Sciences**  
American Educational Research Association

**The Friends of the Institute of Education Sciences** is support the critical research, data, statistics and evaluation programs at IES. Our mission is to advance the objectives of IES and encourage federal investment to conduct the highest quality education research, data collection, evaluations and dissemination at IES.
The Agriculture and Food Research Initiative (AFRI) Coalition is a coalition of scientific societies and science advocacy organizations who support full appropriation of the Agriculture and Food Research Initiative (AFRI) competitive grants program over time.

R. Thomas Van Arsdall
Executive Director, National Coalition for Food and Agricultural Research
Van Arsdall and Associates

The National Coalition for Food and Agricultural Research (NC-FAR) is a nonprofit, nonpartisan, consensus-based and customer-led coalition that serves as a forum and a unified voice in support of sustaining and increasing public investment at the national level in food and agricultural research, extension and education.

Alison Mize
Co-Chair, Biological and Ecological Sciences Coalition
Ecological Society of America

Robert Gropp, Ph.D.
Co-Chair, Biological and Ecological Sciences Coalition
American Institute of Biological Sciences

The Biological and Ecological Sciences Coalition (BESC) is an alliance of scientific and professional societies, associations, and academic institutions that are united by a goal to enhance awareness and appreciation for the biological and ecological sciences on Capitol Hill, at the White House, and in federal agencies.

Julie Palakovich Carr
Co-Chair, USGS Coalition
American Institute of Biological Sciences

Elizabeth Duffy
Co-Chair, USGS Coalition
The Federal Affairs Office

The USGS Coalition The USGS Coalition is an alliance of over 70 organizations united by a commitment to the continued vitality of the United States Geological Survey (USGS) and its ability to provide critical data and services to the nation.

David Moore
Executive Director, Ad Hoc Group for Medical Research
Association of American Medical Colleges

The Ad Hoc Group for Medical Research is a coalition of patient and voluntary health groups, medical and scientific societies, academic and research organizations, and industry that support enhancing the federal investment in the biomedical, behavioral, and population-based research conducted and supported by the NIH.

INNOVATION: AN AMERICAN IMPERATIVE

A call to action by American industry, higher education, science, and engineering leaders urging Congress to enact policies and make investments that ensure the United States remains the global innovation leader.

Our nation knows what it takes to innovate: a sustained commitment to scientific research, a world-class workforce, and an economic climate that rewards entrepreneurship and innovation. As the most dynamic and prosperous nation in the world, the United States has long benefited from policies and investments that have promoted innovation and in turn driven productivity and economic growth. American trade, ensured our health and national security, and safeguarded the American dream. Our leadership is now at risk because of years of under-prioritizing federal scientific research investments and policies that promote innovation.

Now is not the time to rest on past success. As noted by the American Academy of Arts and Sciences in its 2014 Report Restoring the Foundation: The Vital Role of Research in Preserving the American Dream, “There is a deficit between what America is investing and what it should be investing to remain competitive, not only in research but in innovation and job creation.” Competitor nations are challenging our leadership by copying our playbook for success. At the same time our nation’s support for scientific research and innovation is stagnating. If these trends continue, other countries will soon surpass the United States as the global innovation leader.

We must heed the warnings in the Restoring the Foundation report and other salient reports of the past decade and act decisively. In particular, Congress must:

**Renew the federal commitment to scientific discovery**
by ending sequestration’s deep cuts to discretionary spending caps and providing steady and sustained real growth in funding of at least four percent for basic scientific research at: the National Science Foundation, the National Institutes of Health, the Department of Energy’s Office of Science, the Department of Defense, NASA, the National Institute of Standards and Technology, USDA, and NOAA;

**Make permanent a strengthened federal R&D tax credit**
as a part of comprehensive tax reform to encourage more private-sector innovation investment here in America instead of in competitor countries;

**Improve student achievement in science, technology, engineering, mathematics (STEM)**
through increased funding of proven programs and incentives for science and math teacher recruitment and professional development;

**Reform U.S. visa policy**
to welcome and keep highly educated international professionals, particularly those holding STEM degrees from U.S. universities;

**Take steps to streamline or eliminate costly and inefficient regulations**
and practices governing federally funded research to help unburden researchers to focus more time on conducting research and training the next generation of scientists, engineers, health care professionals, and business leaders;

**Reaffirm merit-based peer review**
as the primary mechanism major federal agencies should employ in making competitive scientific research grants to ensure the most effective use of taxpayer dollars; and

**Stimulate further improvements in advanced manufacturing**
through support for programs aimed at accelerating manufacturing innovation and new federal-industry-academic partnerships.

We, the signatories, urge support for these actions to keep the United States the global innovation leader. We stand ready to do our part.
