

February 21, 2018

The Honorable Richard Shelby Chairman Subcommittee on Commerce, Justice, Science, and Related Agencies Committee on Appropriations Room S-128, The Capitol Washington, D.C. 20510

The Honorable John Culberson Chairman Subcommittee on Commerce, Justice, Science, and Related Agencies Committee on Appropriations H-305, The Capitol Washington, D.C. 20515 The Honorable Jeanne Shaheen Ranking Member Subcommittee on Commerce, Justice, Science, and Related Agencies Committee on Appropriations Room S-128, The Capitol Washington, D.C. 20510

The Honorable Jose Serrano Ranking Member Subcommittee on Commerce, Justice, Science, and Related Agencies Committee on Appropriations 1016 Longworth House Office Building Washington, D.C. 20515

Dear Chairmen Shelby and Culberson and Ranking Members Shaheen and Serrano:

As members of the Coalition for National Science Funding (CNSF) – a broad-based group of over 130 professional organizations, universities, businesses, and scientific societies that advocate for robust federal support for the National Science Foundation (NSF) – we appreciate that the new discretionary budget caps included in the Bipartisan Budget Act of 2018 will now allow you and other appropriations leaders to effectively complete the FY2018 appropriations process. A \$63 billion increase in funding for non-defense discretionary programs provides the needed opportunity to strongly invest in America's research enterprise, including the National Science Foundation.

<u>CNSF</u> urges you to seize this opportunity and fund NSF at \$8 billion for FY2018. Such a commitment is necessary for the United States to remain globally competitive. The National Science Board recently released the 2018 Science and Engineering Indicators Report which clearly shows that competitor nations, especially China, are rapidly improving their global position in science and technology while the United States is resting on its laurels of past investments. The <u>report</u> indicates that China is poised to become the global leader in S&T in the next few years. Simply put, the United States must ramp-up its investments in scientific research supported by NSF if we intend to remain competitive and at the forefront of science, technology and innovation.

Last year, during the House and Senate Appropriations Committees' mark-ups of the FY2018 Commerce, Justice, Science, and Related Agencies Appropriations bills, committee leaders expressed the importance of reaching a bipartisan budget deal to increase funding for NSF. Clearly you and other appropriations committee members understand the positive impact NSFfunded research has on our economy, national security and global competitiveness. Due to past budget constraints, however, funding for the agency has remained flat. A request of \$8 billion for NSF in FY2018 reflects **4% real growth** from the FY2016 enacted. This requested increase of 4% real growth is consistent with the first recommendation in the clarion call-to-action, Innovation: An American Imperative, which more than 500 organizations from all 50 states representing industry, academia, and scientific and engineering societies have endorsed. Moreover, this statement has received bipartisan and bicameral support and enthusiasm.

Now that Congress has achieved a bipartisan budget agreement with an additional \$63 billion for non-defense discretionary programs, we strongly advocate that the CJS portion of the FY2018 omnibus bill include \$8 billion in funding for NSF.

Please let us know how we can be helpful.

Sincerely,

Coalition for National Science Funding (CNSF)
